Data structures and algorithms

HTML, CSS, Bootstrap

Latex

Projects

Hotel Management System

The check-in, room allotment, ordering food, check-out, total bill are included in this project.

FM Transmitter and Receiver

The FM transmitter takes the input from the mic and transmits the signal at particular tuned frequency and the by tuning the reciever frequency, we will get the audio output from speaker.

Bike Safety System

This system revords the data of whether the rider wore helmet or not using ultrasonic sensor and shows the data in app.

Indian Diversity and Culture

Designed a website on this topic in hackathon conducted by NIT Mizoram.

Achievements & Awards

Recieved 5 star badge for C++ in Hackerrank.
